SPECIAL
WHOLESALE
PRICE LIST
SPRING
1931

WE HAVE ON FILE
MANY TESTIMONIALS RECEIVED
FROM OUR SATISFIED CUSTOMERS.
SPACE ONLY ALLOWS US TO
SHOW A FEW OF
THEM.

Comparative sizes of our 1 1/2, 3, and 6 in. Peach Trees.

PEARS

Many pear growers have experienced serious trouble with pear psylla. For two years we have had perfect control of this insect by the use of a dormant oil in early spring, followed by an application of a summer oil in July.

20 ft. apart is a very satisfactory planting distance.

	Each	Ten	100
1 yr., 3-5 ft.	\$0.50	\$4.00	\$30.00
2 yrs., 1 1/2 in. cal. and up, 5-7 ft.	.75	6.00	45.00
2 yrs., 3-5 ft. in cal., 1-6 ft.	.65	5.00	40.00

Bearne Bosc 15¢ each extra.

Clapp's Favorite. August 15th. Large, bright red bluish. Good quality.

Bartlett. September 1st. Large, yellow, standard canning variety.

Bearne Bosc. October. Very large russet variety. Finest quality of any variety grown. The tree itself for the first few years is a poor grower, having a tendency to be quite crooked but outgrows this with age.

Seckel. September 10th. Fine for pickling or table use.

PLUMS

	Each	Ten	100
2 yrs., 1 1/2 in. cal. and up, 5-7 ft.	\$0.75	\$6.00	\$45.00

Abundance. Early August. Light with red check.

Burbank. Middle August. Deep red with yellowish background. Extra fine.

German Prune. September. A good purple preserving variety.

Italian Prune. One of the largest of prune varieties.

QUINCES

	Each	Ten	100
Plant 15 ft. apart.	\$0.75	\$6.00	\$45.00

Orange. Well known yellow variety.

Champion. Green variety, follows Orange.

GRAPES

	Each	Ten	100
Plant 6 to 8 feet apart.			
2 year No. 1	\$0.20	\$1.50	\$100.00

Concord. Blue.

Monroe's Early. Blue.

Woden. Blue.

Magnara. White.

Brighton. Red.

Facon. Red. New.

CURRENTS

	Each	Ten	100	1000
Plant 4 feet apart.				
2 yrs. No. 1	\$0.25	\$2.00	\$15.00	\$125.00

Fay. Large red. Early.

Perfection. Large red. Follows Fay.

Wilder. Exceedingly productive. Strong grower. Red.

GOOSEBERRIES

	Each	Ten	100
2 yrs. No. 1 Downing. Pearl colored	\$0.30	\$2.50	\$20.00
2 yrs. No. 1 Josselyn. Red	.55	3.00	25.00

RASPBERRIES

	Each	Ten	100
Plant black varieties 3 x 5 feet.			
Plant red varieties 2 x 5 feet.			

Cuthbert. Red.

St. Regis. Red, everbearing.

Plain Farmer. Black.

Columbia. Purple.

Latham. Greatest producer, strongest grower, hardiest and most resistant to disease of all raspberries.

SPRING 1931

SPECIAL WHOLESALE PRICE LIST

WALLINGFORD NURSERIES OF

BARNES NURSERY & ORCHARD CO.
WALLINGFORD, CONN.

Please do not confuse us.

We have no connection with any other "Barnes" company. Members of our company are:

Norman H. Barnes

Daniel P. Barnes

TO OUR FRIENDS:

The year of 1930 has been a notable one for low prices. We are orchardists as well as nurserymen, and are therefore able to appreciate the orchardist's viewpoint. Were the low prices of 1930 confined only to fruits we might well wonder at the wisdom of our calling. But, we can find a little consolation in the fact that the fruit industry probably has suffered no more than other lines of business whether it be vegetable growing, poultry raising, or manufacturing. Copper has sold at the lowest prices since 1895, steel has been at prewar prices and so on down the list. Unemployment has reduced the buying power of the public, resulting in a generally abnormal condition from which we cannot say that overproduction in any particular line is responsible. There are occasionally unsatisfactory years in any industry, and we look forward to the year 1931 with the optimism that the worst is past, and that two such years do not often follow one another.

It has always been our policy to give the most for the least possible price.

We have no salesmen, and here is a big saving which we have passed on to our customers. Recently, we have issued an abbreviated catalogue or circular. This of course greatly reduces the cost of our advertising and makes possible a still lower selling rate.

If FURTHER DESCRIPTION OF VARIETIES IS DESIRED, WE SHALL BE GLAD TO FURNISH A DESCRIPTIVE CATALOGUE UPON REQUEST.

CERTIFICATION

Our experience in the past, has been that few people are willing to pay the additional cost of having seals put on to certify trees. However, we are still continuing our practice of having the trees inspected by Dr. J. K. Shaw of Amherst, Mass., nationally known as the originator of identification of apple trees by their leaf characteristics. Dr. Shaw's statement of the 1931 inspection follows:

Amherst, Mass.
September 13, 1930

TO WHOM IT MAY CONCERN

This is to state that I have examined for trueness to name all the apple stock now growing in the nurseries of the Wallingford Nursery of Wallingford, Conn., and that as they now stand in the nursery row all trees are, to the best of my knowledge and belief, true to name.

Very truly yours,
J. K. Shaw

NON-WARRANTY

We strive to avoid mistakes but in the event that any nursery stock sold by us should prove untrue to the label under which it is sold, provided neither and proper proof are furnished to the seller, the seller shall at the option of the buyer either refill that portion of the order which was mislabeled, by another delivery of stock or refund the purchase price. But in any case the seller is not to be held responsible for a sum greater than the original selling price of such stock. All sales or agreements to sell are made subject to shortage of nursery stock from fire, frost, flood, drought or other causes beyond control of the sellers.

APPLICATION OF PRICES

Customers may select 5 of any kind of fruit such as 5 peach at the 10 rate, 35 at the 100 rate, 350 at the 1000 rate.

MINIMUM ORDER

On account of the high cost of handling orders, we cannot accept orders of less than \$100.

DISCOUNT

5% Discount may be deducted on all orders where the total amount is remitted with the order and this is sent before April 1st.

TESTIMONIALS

Northumberland, Pennsylvania
January 20, 1930

Gentlemen:-

Your stock which I first received from you four years ago bore last season and the first hundred peach were true to name. I have great confidence in your enterprise.

Yours truly,
C. E. Hilliard

Dunkirk, New York
March 10, 1930

Dear Sirs:-

We want to express our appreciation of the good quality of your nursery stock. The 80 trees bought of you last year are all alive and growing fine.

Yours truly,
C. E. Shero

East Greenwich, R. I.
April 9, 1930

Gentlemen:-

You gave me the surprise of my life when I saw the size and good condition of the trees I received. I removed them from the box in the freight house, and had the general country corner audience and they all expressed the same opinion.

Yours truly,
W. O. Young

Grafton, Mass.
April 7, 1930

Dear Sirs:-

I was very well satisfied with both the trees and the plants you sent me.

Yours very truly,
A. P. Brown

Torrington, Conn.
May 5, 1930

Gentlemen:-

Everything was in perfect condition. You will receive my orders for any and all trees in the future. Thanking you very much for patiently waiting for my check, I remain,

A satisfied customer,
George Pascoe

Southbridge, Mass.
May 7, 1930

Dear Sirs:-

I purchased trees from you six years ago, and they are fine trees.

Very truly yours,
John P. McKinstry

SIZE OF TREES

Caliper or diameter governs the size of all fruit trees except 1 year apple. Height is only approximate.

STANDARD APPLE TREES

Permanent apple trees should be planted from 36 to 40 ft. apart. Filler varieties which bear young and consistently such as Wealthy, Wagener, Yellow Transparent, or Rome Beauty, and also peach trees where land and climate are suitable, may be planted between, making the distance 18 to 20 ft. The filler trees will carry along the permanent trees so that when it is necessary to take out part, the cost of growing those remaining will have been paid by the younger, quicker bearing varieties.

As the trees begin to crowd, by taking out every other tree, they will be left about 28 ft. apart diagonally, and in later years, again taking out every other tree, leave them 40 ft. apart. Thus for 25 to 30 years the land will be returning an extra crop before the permanent trees need the room.

We wish also to call attention to our 5 year old apple trees. They were transplanted 3 years ago, making it possible for us to dig them with good roots. Many of these trees bore apple in the nursery row in 1930, and will save the grower much time. We recommend them especially to home planters. Supplied only in varieties starred.

	Each	Ten	100	1000
5 yr. 1 in. cal., 6-8 ft.	\$1.00	\$9.00		
5 yr. 1 1/2 in. cal., 8-10 ft.	1.50	13.50		
2 yr. 1 1/2 in. cal. and up, 5-7 ft.55	5.50	\$26.00	
2 yr. 2-3 in. cal., 4-6 ft.60	6.00	25.00	
2 yr. 2 1/2 in. cal., 3 1/2-5 ft.40	4.00	20.00	
2 yr. 3-4 in. cal., 3-4 ft.30	3.00	15.00	
1 yr. 1-5 ft.60	6.00	25.00	
1 yr. 3-4 ft.10	1.00	20.00	

Exceptions: Standard McIntosh and Baldwin at \$5.00 per 100 less than regular prices.

Dwarf Doux McIntosh and Baldwin at 10¢ each more than regular prices.

Milton in 1 yr. stock only, 5¢ each extra.

Macon and Red Rome in 1 yr. and 2 yr. at 5¢ each extra.

Red Gravenstein (Washington strain) 5¢ each extra.

Baldwin, large red winter apple. New England Baldwins have made a name for themselves in the export trade this year. \$5.00 per 100 less than regular prices.

Cortland, very similar to McIntosh in flavor. Larger, darker red, ripens two weeks later, hangs to tree better, keeps better, and well worth planting.

Delicious, large, red, fancy table apple. Early winter.

Duchess, striped red. Early August. Following Red Astrachan.

Early McIntosh, a cross between McIntosh and Yellow Transparent. Originated at Geneva Experiment Station, New York. The fruit is very similar to McIntosh in all respects, ripening after Yellow Transparent. Tree is a good thrifty grower and bears annually.

Fall Pippin, well known Fall variety.

Gravenstein, large, striped, red.

Red Gravenstein, (Meade strain). Similar to Gravenstein, but darker red. Fruit allowed to stay on tree will color solidly.

Red Gravenstein, (Washington strain). Originated in the state of Washington—said to be the very best strain of Red Gravenstein, similar to Gravenstein, but a much darker red, 5¢ each extra.

King, a very large, red Fall apple. Fine for table use and baking. Supplied in 8-10 ft. transplanted stock only.

Macoun, (Description by New York Fruit Testing Association, Geneva, New York), 5¢ each extra.

Just as Early McIntosh advances the season for the McIntosh type of apple, Macoun produces a late crop of these red-skinned, white-fleshed, richly flavored, aromatic apples. The season of Macoun is from one to two months later than that of McIntosh with Cortland midway between. In shape, the fruits of Macoun are similar to those of McIntosh; the color is a darker red, less striped, and with a heavier bloom; the flesh is much the same in color, texture, flavor and aroma. The trees bear regularly and heavily. This promises to be an apple of great merit coming in, as it does, long after all other McIntosh-like apples are out of season.

McIntosh, McIntosh, may well be called the King of Apples for New England and vicinity. September, \$5.00 per 100 less than regular prices.

Milton, (Description by New York Fruit Testing Association, Geneva, New York), 1 yr. stock only, 5¢ each extra.

Milton is a sister of Early McIntosh which ripens its crop a month later. Its main value is that it is a McIntosh type which ripens a month before McIntosh. The tree is vigorous but not as large as that of Early McIntosh. The fruits are covered with a very attractive pinkish red and heavy bloom. The flesh is white, tender, crisp, juicy, and of McIntosh flavor and aroma.

Northern Spy, well known early Winter red variety.

Opalescent, very large, red apple. Fall.

Red Astrachan, best, early red apple. August 1st.

Red Spy, a sport of Northern Spy. Similar in all respects to Northern Spy except in coloring in which it much surpasses its parent, having a solid red.

R. L. Greening, fine dessert variety. Early Winter.

Red Rome, a red strain of the Rome Beauty, 5¢ each extra.

Rome Beauty, late Winter, red apple.

Roxbury Russet, very late Winter russet apple.

Stark, large, red, late Winter. Very productive, 5 yr. trees only.

Stayman Winesap, standard Winter apple in New Jersey. A good variety for late Winter in some sections of New England. Large, red apple.

Wealthy, fine filler variety, often bearing fruit in Nursery at two years of age. Red. Late August.

Wagener, great filler variety. Bears young. Red, early Winter.

Williams Red, summer apple. Following Duchess.

Yellow Transparent, the first early apple of importance. Fine filler variety.

Hyslop Crab, very productive. Red.

PEACHES

For three years, we have left our peach trees in the field during the winter having them freshly dug in the spring. The results have been all we could possibly ask. Satisfied customers everywhere. We believe firmly that now is a most opportune time to plant. The Carolinas and Georgia which two or three years ago were in overproduction are on the decline, and to the best of our knowledge, there has been no large planting of peaches anywhere which will replace these states. A peach orchard planted now, will most certainly come into bearing with less competition from outside sources than for years.

In regard to our peach trees living in the field we will not have an acre grade until spring, which may make a substitution of sizes necessary in certain instances, but we hope not. Under early and have the trees reserved. Plant 18 to 20 ft. apart.

	Each	Ten	100	1000
13 in. cal. and up, 5-7 ft. Extra large grade ...	\$0.75	\$7.50	\$49.00	Write
